OPERATOR'S MANUAL

To The Owner

The Trailer for the International Cub Cadet Tractor is a ruggedly constructed all steel box equipped with a removable endgate to facilitate unloading. It has a volume of 4-1/2 bushels (level load) with a load capacity of over 1/4-ton of sand or similar materials. Stake sockets are also provided for the addition of sideboards for increased capacity of light

voluminous materials such as leaves, grass clippings, brush cuttings, etc. The trailer is equipped with 4.80/4.00-8 pneumatic tires and tubes to cushion the load.

The sturdy constructed dump-type trailer has a wide range of use and is especially adaptable to small acreage farms and also for suburban use.

OPERATING

Illust. 2

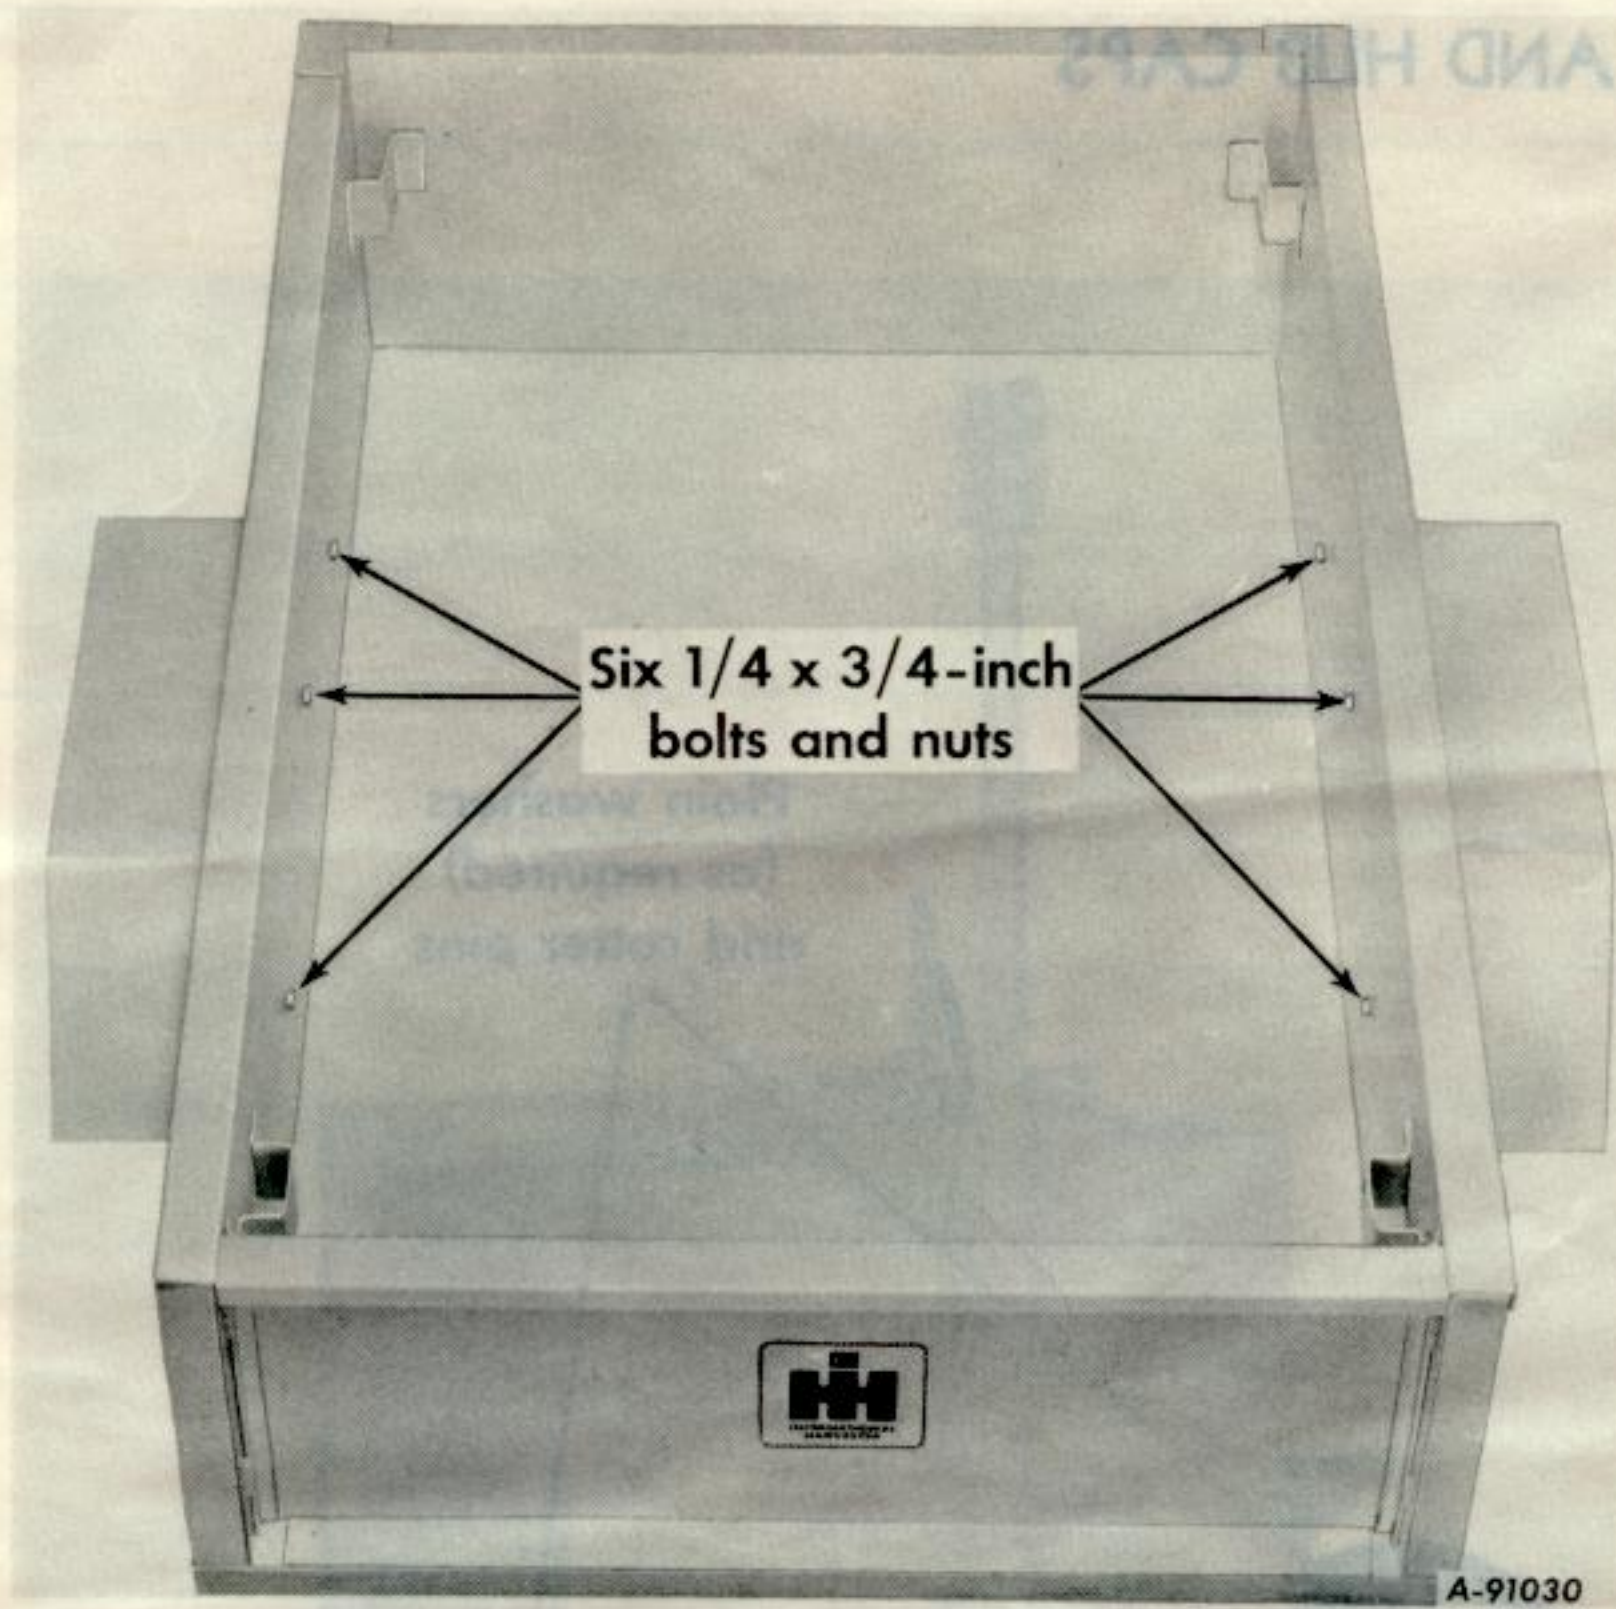

To fully unload the dump-type trailer, remove the endgate and release the spring latch. The trailer will lower itself to the ground as shown in Illust. 2. A cord or rope can be attached to the spring latch for easy release from the

driver's seat. After unloading, pull the front of the box down until the latch snaps in place.

Using a pressure lubricator, periodically lubricate each wheel bearing.
